Portfolio: https://dlope0831.github.io/all-about-daniela-lopez/

A highly motivated individual working towards a certification as a full-stack web developer. A passion for learning and efficiency has delivered innovative solutions to nationwide clients. An individual that thrives in high-paced environments collaborating with a team or working individually. Strong troubleshooting and problem-solving skills with an analytical mindset.

TECHNICAL SKILLS

Frontend: HTML5, CSS, jQuery, JavaScript, Bootstrap, AJAX, SASS,
Backend: MySQL, MongoDB, Express, ReactJS, Node, Handlebars, Firebase, AWS, Webpack, Gulp

PROJECTS

Find Your Game   JavaScript and API Development

- The application was created for game users, from intermediate to advanced levels, to find a new game filtered by their interests.
- The project utilizes JavaScript and APIs to fetch data and manipulate the DOM. I constructed the API fetches and the JavaScript function that runs the data successfully.
- Tools/Languages: JavaScript, Bulma, CSS, APIs, HTML
- Application Link: https://dlope0831.github.io/find-your-game | GitHub Repo: https://github.com/dlope0831/find-your-game

SkyNet Watch   Frontend and Backend Development

- The application was designed to give users the real-time ability to create posts that are displayed on the activities page. Users can interact with other posts by commenting or clicking a reaction button, "Like" or "Dislike".
- This project harbors an environment to create valuable connections with your neighbors by creating posts of upcoming events, commenting on other users' posts, and interacting with others - all in real-time.
- Tools/Languages: JavaScript, Node, Sequelize, Express, Session, mySQL2, Bcrypt, BootStrap, Handlebars, CSS, Heroku
- Application Link: https://polar-atoll-04436.herokuapp.com | GitHub Repo: https://github.com/dlope0831/SkyNet-Watch

README Generator   Developer

- The application was created to save developers time from creating a README.md file from scratch. Developers can generate a README.md file directly from their terminal command line by cloning my project repository and following installation instructions.
- This is a command-line application that runs with Node.js that dynamically generates a README.md file based on input about the user's project.
- Tools/Languages: JavaScript, Node.js, Inquirer
- Application Link: Application video included in the README.md | GitHub Repo: https://github.com/dlope0831/readme-generator
